The Workshop has been updated to include the spell line changes for DAoC 1.100. In case you missed the patch notes on the herald, here's what changed.

A new Disease spell has been added to the Ice Magic Specialization Line for Wizards.

- Level 17 – Mitigating Cold – 3s cast / 1.5 minute duration – 1500 range / 250 radius – 7.5% Strength Debuff / 15% Movement Speed Debuff – 11 power
- Level 25 – Subduing Cold – 3s cast / 2 minute duration – 1500 range / 300 radius – 7.5% Strength Debuff / 15% Movement Speed Debuff – 16 power
- Level 35 – Inhibiting Cold – 3s cast / 2.5 minute duration – 1500 range / 350 radius – 7.5% Strength Debuff / 15% Movement Speed Debuff – 22 power
- Level 45 – Debilitating Cold – 3s cast / 3 minute duration – 1500 range / 400 radius – 7.5% Strength Debuff / 15% Movement Speed Debuff – 29 power

Also supported are the new Dragon Mythirians. Actually this is nothing new, as the mythirian slot has been capable of handling 12 slots for a few years now. I must have foreseen this ;)

Seriously though, I'm sure the stats may change, if so you can bet there will be an update!

A note about the Workshop and Vista and Auto-Updates ... and you!

IF you are running Windows Vista or 7 you may notice that when the workshop updates, nothing seems to happen. Before you go deleting or uninstalling things (we don't want you doing anything crazy now) You will need to start the workshop as an administrator. To do this, in case you don't already know, right click on the program icon and select "Run as Administrator" this will allow the workshop to patch and start up properly.

Enjoy!
